

Overview

- We supply filter medias like glass fiber, Hi-loft, Polyester Hi-loft, Reticulated Filter foam, Non Woven PP Felt, Needle punch filter felt, Polyester filter fabric and others more used in various applications. This filter media are constructed from high quality raw materials.
- They are highly suitable for air filtration in various applications like paint industries, Steel industries, Electronics, Pharmaceuticals, Chemical industries, Oil and Refineries and other industries.

Features & Benefits

- World class filter media with grade 'A' fibers
- High dust holding capacity ensures long service life.
- 100% thermally bonded.
- Progressive density synthetic filter media.
- Inexpensive, Easy to deliver, Store, Install and dispose.
- Filters conform to EN 779 & ASHRAE 52.2 test standards

Application

- Pharmaceutical Industries
- Paint shop
- Automotive
- Semiconductor
- Food Industries
- Biotech, Dairy, Beverages

Specification

- Filter Media : Glass fibre, Polyester
- Size : 1500mm Width x 10,20,50,100 meter long roll type
- Micron Rating : 05, 10, 20, 50, 100
